Millcreek, UT

Summary

API Support Specialist with hands-on experience troubleshooting SaaS application issues through reproduction, documentation, customer communication, logs, and technical investigation. API-focused foundation with experience using REST APIs, Postman, Python, Flask, JSON, and New Relic, including building and testing a REST API and independently investigating production application performance issues.

Skills

- **Technical:** REST APIs, HTTP, JSON, Postman, New Relic, Python, Flask, JavaScript, Git.
- **Specialties:** API Troubleshooting, Workflow Automation, Technical Troubleshooting, SaaS Support, Customer Communication, Documentation.

Work Experience

API Support Specialist

Filevine | October 2026 - Present | Salt Lake City, UT

- Support and troubleshoot API-related customer issues, using request/response behavior, authentication context, endpoint configuration, API documentation, Postman, and application telemetry to investigate integrations and identify actionable next steps.

Technical Support Engineer

Filevine | October 2025 - October 2026 | Salt Lake City, UT

- Troubleshoot SaaS application issues through reproduction, documentation review, evidence gathering, and systematic problem isolation.
- Investigate API-adjacent issues using request/response behavior, status codes, endpoint configuration, authentication context, API documentation, Postman, and testing environments.
- Built two workflow automations in LOIS Workflows, gaining hands-on experience configuring and testing workflow logic within Filevine's internal automation platform.
- Use New Relic logs and application telemetry to trace behavior and gather evidence for complex investigations and engineering escalations.
- Create internal documentation and SOPs and mentor team members on troubleshooting, customer communication, and internal processes.

Technical Support & Automation Developer

Colemere Realty | Freelance / Pro Bono | August 2025 | Remote

- Built a Google Apps Script automation for recurring water-bill reminders, reducing manual administrative work for a real-estate client.
- Created step-by-step documentation and a walkthrough video so the client could configure, maintain, and adopt the automation independently.

Independent Technical Contractor

Ten Sleep Rock Ranch | July 2026 | Remote

- Investigated production WordPress performance issues related to an HBook integration, isolating differences between cached public traffic and authenticated administrative requests.
- Used browser network analysis, Query Monitor, logs, caching behavior, and controlled testing to narrow performance bottlenecks and communicate findings to the client and vendors.

Senior Account Specialist

Discover Bank / Capital One | November 2024 - October 2025 | Remote

- Resolved customer account and technical issues while translating complex processes into clear, user-friendly explanations.
- Designed, developed, deployed, and pitched a Python/Flask reporting tool to leadership to surface call-volume, duration, and operational KPI trends.

Projects

REST API | Python, Flask, Postman

Personal Project

- Built a RESTful API with CRUD operations, resource endpoints, request validation, filtering, sorting, query parameters, JSON processing, and HTTP status/error handling; tested endpoint behavior in Postman.

Call Trend Tracker | Python, Flask, Pandas, AWS

Project

- Built and deployed a full-stack reporting tool that analyzes customer call volume and duration and presents operational KPI insights.

Education & Certifications

Coding Dojo - Full Stack Development (2024) | Postman API Fundamentals Student Expert (2025) | HubSpot Service Hub Software (2025) | New Relic Verified Foundation (2026)
